**ORB™
GEAR DRIVE**

The Orb™ Planetary Gear Drive System has a compact, single axis design that negates the need for a belt, chain, or external flywheel. It is a completely enclosed, three piece crank with an aligned sun gear. This means less maintenance to loose belts, broken chains, and external flywheels.

**CORE ACTIVE,
SWAY FRAME™**

The Core Active Sway Frame™ sways with body movement so that riders can engage their core muscles in order to get more out of a traditional cardio workout. The pivot-locking feature (exclusive to the Evo cx/mx models) can also provide riders with a more traditional indoor cycle feel.
